

EXTRA TRASPIRANTE

Transpiring Hydro Painting

Description

EXTRA TRASPIRANTE is a hydro painting formed of emulsifying resins, inert pigments at high resistance with high percentages of fungicides and bactericides. **EXTRA TRASPIRANTE** is used for inside spaces and it has got a very good coverage with the objective of preventing the formation of molds on walls. It offers great transpirability and it is very effective throughout time only if not covered with other paintings.

Thecnical data

- Specific weight: 1.589 kg
- Use: 130-170 g/m² per layer
- Result: 4.5-7 m²/l when the two-hand work is over

Dull finishing for inside spaces, good for any kind of wall support finished with smooth finishing plaster, thin mortar or already treated walls. It gives homogeneity and a nice aesthetic aspect to the walls.

Application

EXTRA TRASPIRANTE is used as protection and decoration of finishing plasters for internal spaces and walls that have been previously painted.

Base preparation

- Apply the material only over seasoned and dried plasters.
- Avoid the application during the coldest months of the year.
- Apply at a temperature higher than +5 °C and lower than + 35°C.

Supply

14 and 5 liters cans. Colors: white available. Under request warm pastel colors (see the colors folder).

Warnings

Avoid the preservation in very cold places. Preserve at temperatures higher than +5 °C and lower than +30 °C.

If stocked in proper places lasts 1 year.
